You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type	Ordinary shares in a company registered in the British Virgin Islands. Save for payments of dividends or other returns pursuant to the Company's ordinary share distribution policy (as detailed in the Circular, published by the Company in April 2019, available on the Company's website), the Company is not expecting to pay you and you are expected to generate returns through selling your shares through a bank or stockbroker.
------	--

Objectives

The Company's investment policy is to realize all its portfolio assets in a controlled, orderly and timely manner.

The Board's and the Investment Manager's objective is to dispose all of the Company's assets by 31 December 2021 (the "Divestment Period").

The allocation of any additional capital investment into any of the Company's projects will be substantially sourced from joint venture agreements, third-party capital providers and project level debt with the sole objective of enhancing the respective asset's realisations potential and value within the Divestment Period.

Intended retail investor

The ordinary shares are listed on AIM market of the London Stock Exchange and as such are intended for institutional, highly knowledgeable and professionally advised investors.

The ordinary shares are not intended for retail investors.

Maturity

N/A

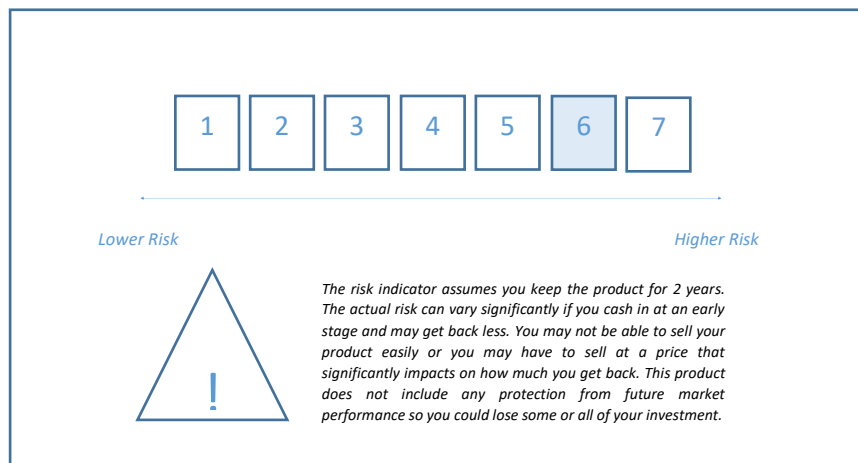

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is a high-risk class.

This rates the potential losses from future performance at a high level, and poor market conditions could impact your returns.

The whole amount of your invested capital in the Company is at risk and there can be no guarantee that you will get back any or all of the amount invested on a sale of shares in the Company. The price at which shares in the Company are sold in the market has not historically tracked the Company's net asset value per share.

REFERENCES TO THE COMPANY PAYING YOU MONEY ARE REQUIRED BUT MAY BE MISLEADING. YOU MAY RECEIVE SOME DIVIDENDS FROM THE COMPANY DURING YOUR INVESTMENT, BUT THE MAJORITY OF YOUR RETURN WHEN YOU SELL YOUR SHARES IN THE MARKET.

Performance Scenarios

This table shows the money you could get back over the next 2 years under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not exact indicators. What you will get will vary depending on how the market performs and how long you keep the investment.

The stress scenario shows what you might get back in extreme market circumstances and it does not take into account the situation where we are not able to pay you.

The figures shown include certain the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Investment scenarios		1 year	2 years
Stress scenario	What you might get back after costs <i>Average return each year</i>	£3,488.94 (65%)	£2,564.01 (74%)
Unfavourable scenario	What you might get back after costs <i>Average return each year</i>	£4,592.40 (54%)	£3,677.48 (63%)
Moderate scenario	What you might get back after costs <i>Average return each year</i>	£10,109.73 1%	£9,184.80 (8%)
Favourable scenario	What you might get back after costs <i>Average return each year</i>	£21,144.38 111%	£20,219.46 102%

What happens if Dolphin Capital Investors Limited is unable to pay out?

As a shareholder of Dolphin Capital Investors Limited you would not be able to make a claim to the Financial Services Compensation Scheme nor any other investor protection scheme about the Company in the event that the Company were unable to pay any dividends or other returns it may elect to pay from time to time, or if it were unable to pay any amounts due to you on a winding up at the end of its life. If you sell your shares on the AIM market of the London Stock Exchange, your bank or stockbroker will receive cash on delivery of your shares and should pass that to you.

What are the costs?

Presentation of Costs

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account certain one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The Company is required by law to include the information above and below exactly as it has been presented. That law was drafted for investment products which pay returns directly to investors, not those for which a return is expected to be delivered by the investor selling shares on a market. The Performance Scenarios above are shown based on returns from dividends or other distributions. They are entirely independent of the costs shown below, all of which are borne by the Company and have no direct impact on investment performance of the Company's shares.

If you chose to sell your shares, you would pay your bank's or stockbroker's dealing charges and be selling at the offer price available when your sale instruction was processed on the market. The offer price is likely to be lower than the bid price at which investors could buy shares at the same time. Prices quoted for shares in the media are typically the mid-price, being half way between the offer price and the bid price.

Costs over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment £10,000 Scenarios	If you cash in after 1 year	If you cash in after 2 years
Total costs	£790	£1,581
Impact on return (RIY) per year	7.9%	15.8%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	n/a	The impact of the costs you pay when entering your investment.
	Exit costs	n/a	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	n/a	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	7.9%	The impact of the costs that we take each year for managing your investments and the costs associated with running the Company.
Incidental costs	Performance fees	n/a	The impact of the performance fee.

How long should I hold it and can I take money out early?

According to the latest circular dated 10 April 2019, the Board's and the Investment Manager's objective is to dispose all of the Company's assets by 31 December 2021.

As the Company's shares are listed on the AIM market of the London Stock Exchange, you can expect to sell them at any time through your bank or stockbroker.

How can I complain?

If you have any complaints about the Company, you may lodge your complaint via email to:
